

Learn and discover at the magical

UCPS ZOO

*Your zoo opening was a great success!
The guests were amazed by your new
design and the animals are all enjoying
their new enclosures.*

However, one of your animals is starting to look a little poorly. You must look after them in your newly built animal hospital. First, check that you have got everything you need. Can you make a list? Then set up your very own animal hospital in your home. It must include all of these items! (You might need to make some of these if you cannot find them around the house). Remember to label all your equipment Year 2!
