spicy

Solving number problems.

In your workbook:

Find different ways of making your total.

You can use addition, multiplication, division and subtraction.

You can use the same number only once in any calculation.

Which way uses the fewest / most of these numbers to make your total?

1) **2 4 5 15 17 19 36**

*Find different ways of totalling **40***

2) **5 17 19 37 39 46 66**

*Find different ways of totalling **100***

3) **10 17 27 45 48 83 85**

*Find different ways of totalling **120***

Extra spicy

You can ever try creating your own number questions

How many different ways of reaching each number can you find?
